Mactac JT 8300
CG-RT Dot Red & Yellow

Sales season is approaching, look no further!

JT 8300 Red and Yellow Dot films are transparent coloured films that allow converters to achieve a big, colourful impact without having to print a background red or yellow colour first.

The unique transparent coloured finishes provide vibrant backgrounds for short-term applications: “These products facilitate easy conversion of graphics with standout promotional messages. Converters can also create vibrant graphics using nothing more than black and white inks on JT 8300 Red or Yellow Dot.

Moreover, the product comes with the popular Mactac Dot adhesive which makes the films even easier to install than air-egress films. No specialist tools or water are needed during application, and adhesion is good on glass and smooth surfaces.

Advantages

- Unique transparent red and yellow finishes ideal for promotional advertising
- Ease of application and removal thanks to dotted adhesive, even for unexperienced users
- Time saving for printing and converting
- Good printability on all main supports
- Great results when printed with black, white and metallic inks.
