

Águas Azuis participates in Navalshore 2022

Águas Azuis, Special Purpose Company (SPE) established between thyssenkrupp Marine Systems, Embraer Defesa & Segurança and Atech for the construction of the frigates Classe Tamandaré for the Brazilian Navy, is among the participants of the 16th edition of Navalshore, the biggest event of the naval construction industry of Latin America, which will be held within August 16 and 18, in the city of Rio de Janeiro (RJ).

Águas Azuis CEO, Fernando Queiroz, will be one of the lecturers in the panel “Renewal and Expansion Programs for the Brazilian Navy’s Naval Assets”, scheduled to 16th at 4:45 pm. In the occasion, he will present a status of the Programa Fragatas Classe Tamandaré acknowledged as the most modern and innovative naval project already developed in Brazil. The frigates are being built in thyssenkrupp Estaleiro Brasil Sul, in Itajaí (SC).

“Navalshore will be a great opportunity to reinforce the importance of this program. The acquisition of the frigates integrates the efforts of the Navy to modernize its Naval Force, allowing, thus, the renewal of the Brazilian squadron. The ships are being built from a technological platform never seen in Brazil and the project predicts a strong transfer of technology, that will assure the maintenance of the fleet during all the life cycle of the vessels and will contribute for the strengthening of the national naval defense cluster”, highlights Queiroz.

Navalshore happens from August 16th until 18th, from 1pm to 8pm in Expo Mag. More information about the event may be obtained in the website www.navalshore.com.br/pt/.

About Águas Azuis

The companies integrating Águas Azuis have a solid and long relationship with Brazil, in addition to strong presence in many other countries. Thyssenkrupp Marine Systems is providing naval technology of its well-known platform of defense ship construction of Class MEKO®, already used in 82 vessels in operation in Marines of 15 countries, among them Portugal, Greece, Australia, Argentina and Algeria.

Embraer Defesa e Segurança is responsible for integrating some sensors and weaponry to the combat system, incorporating to the Program its more than 50 years of experience in solutions of systems and support technology in service. On the other hand Atech, company from Grupo Embraer, expert in engineering and system integration, is responsible for the development of the Combat Management System (CMS), of the Tactical Data Link and by the activities of integration and Tests of the combat system, in partnership with ATLAS ELEKTRONIK, subsidiary of thyssenkrupp Marine Systems, and also Integration Platform Management System (IPMS), in partnership with L3Harris. Atech participates, in conjunction with the Brazilian Navy, of the Transfer of Technology process of these Systems, activity of great importance that will allow having access to the knowledge and tools to operate and maintain the ship systems in the future.

The naval alliance between thyssenkrupp Marine Systems and Embraer Defesa & Segurança will also allow creating bases for products export of naval defense from Brazil.
