

thyssenkrupp successfully completes sale of Automation Engineering to Agile Robots

- Closing marks next step in the strategic development of thyssenkrupp Automotive Technology
- New ownership structure creates long-term perspective for Automation Engineering

thyssenkrupp Automotive Technology has successfully closed the sale of its Automation Engineering business unit to Agile Robots SE, Munich, following the agreement reached in November 2025.

The transaction marks another important milestone in the segment's strategic development. thyssenkrupp Automotive Technology is consistently aligning its portfolio toward high-growth, capital market-ready businesses while at the same time creating a sustainable long-term perspective for Automation Engineering under new ownership.

Automation Engineering is now part of the Agile Robots Group and will operate under the name "Krause Automation" as an independent system provider for industrial automation solutions. The combination of engineering expertise in special-purpose machinery and technological strength in robotics and artificial intelligence opens up additional growth opportunities in both existing and new markets.

Dr. Volkmar Dinstuhl, CEO of thyssenkrupp Automotive Technology: "With the successful completion of this transaction, we have taken another important step in executing our strategy. Automation Engineering is now well positioned to further develop under a strong industrial owner. At the same time, we continue to sharpen our portfolio with a clear focus on growth and capital market readiness."

The sale of Automation Engineering is part of the repositioning of thyssenkrupp Automotive Technology initiated in 2025. Going forward, the segment will focus on its four core areas: Chassis, Components, Aftermarket, and Forging. The objective is to drive profitable growth and further enhance capital market readiness through a clear portfolio focus, technological strength, and increased customer proximity.

About thyssenkrupp Automotive Technology

thyssenkrupp Automotive Technology is a leading system partner to the global automotive industry. As of October 1, 2025, the segment has been realigned around four customer- and technology-focused business units – Chassis, Components, Aftermarket and Forging – to ensure greater customer proximity, more efficient collaboration and profitable growth. In fiscal year 2024/2025, the segment employed around 28,900 people and generated sales of €7 billion. As a quality provider in key technologies for chassis, steering and powertrain, thyssenkrupp Automotive Technology is shaping the mobility of tomorrow.
