Location	Belgium
Plant type	Production of calcium sulfate anhydrite
Service type	Replacement of a kiln tyre shell section
Year	2016

Delivery of a kiln tyre shell section for a customer in Belgium

Project description

In 2016, a customer commissioned thyssenkrupp Polysius to **replace a kiln tyre shell section, including installation.**

The customer produces a thermal calcium sulfate anhydrite in a rotary kiln. Calcium sulfate anhydrite is mainly used in the construction industry (cement production, aerated concrete).

Results

- Delivery and installation took place 2016
