

J P Soni, Head - Process speaks at IGCC's Knowledge session

J P Soni, our Senior General Manager and Head of Process presented a paper on our “**Large scale Modular Alkaline Water Electrolysis (AWE) technology for green hydrogen plants**” at a **Knowledge session on Large Scale Green Hydrogen Production** on **14 July 2021**.

The session was being organized by the Indo German Chamber of Commerce (IGCC) in association with Indo German Energy Forum and VDMA, a bridge-head between the German and Indian Industry. The online session was attended by over 400 participants and generated a number of interesting observations.

After the opening remarks from Mr. Stefan Halusa, Director General, Indo-German Chamber of Commerce, Dr Nicole Glanemann, Deputy Head from Ministry for Economic Affairs and Energy, Germany; Mr. Peter Müller-Baum, Managing Director P2X4A, VDMA and Mr. Chirag K Shah, Chief Manager, SIEMENS Ltd and Soni spoke. The presentations were followed by the Question-Answer session which was moderated by Mr. Tobias Winter from IGCC.

Green Chemicals is a focus area for Business Unit Uhde, having the potential to make industrial processes of production cleaner, through the generation of Green Hydrogen and Oxygen, and the downstream derivation of Green Chemicals. This also is in line with our Purpose Statement: **We create a livable planet.**
