

# JP Soni, Head - Process speaks at Green Hydrogen in India Conference

JP Soni – our Senior General Manager and Head – Process presented a paper on our “**Large scale Modular Alkaline Water Electrolysis (AWE) technology for Green Hydrogen Plants**” at the 2nd Edition of the **Green Hydrogen in India** conference organized by **India Infrastructure Publishing Pvt. Ltd. on 16-17<sup>th</sup> September, 2021.**

We were the **Technology Partner** for this 2-day Conference.

The presentation was well received by the attendees which included the experts from the industry, potential customers as well as stakeholders from the government bodies viz. NITI Aayog, MNREGA and academicians from IIT Bombay and CSIR – National Chemical Laboratory.

Mr. Soni fielded an interesting series of questions during the Q&A session post his presentation. The interest generated in the attendees was visible as the organizers had to discontinue the Q&A session for the following speaker.

Green Chemicals, a focus area for our Business Unit Uhde, has garnered sufficient interest in the current times that aim at decreasing the impact of the GHG on the atmosphere. Our technologies which align with our Purpose Statement: **We create a livable planet**, offer potential to the chemical industry to make the production processes cleaner, through the generation of Green Hydrogen, and the downstream derivation of Green Chemicals.

**Business Development: 18.09.2021**
