

tkIS India associates with India Infrastructure Virtual Conference as 'Technology Partner'

thyssenkrupp Industrial Solutions (India) is the Technology Partner for the “Green Hydrogen in India” Conference organized by the India Infrastructure Publishing Pvt. Ltd. on 16th and 17th September 2021.

The event aims to bring together technology providers, policymakers, renewable energy developers, grid planners, industry experts and investors to present their perspectives and offer possible solutions for shaping the future of Green Hydrogen in India.

JP Soni, our Senior General Manager and Head of Process will present a paper elaborating our Alkaline Water Electrolysis (AWE) Technology for the production of Green Hydrogen and resultant carriers/application at the conference.

Green Chemicals is a focus area for Business Unit Uhde in tandem with global trends and our own government’s commitment to make it the resource of the future. With its versatility and environmental benefits, it is considered a ‘must-have’ for our world, if we are to become carbon-neutral. This is also in line with our group’s Purpose Statement : We create a livable planet.
