

Indmax FCC Unit inaugurated, dedicated to nation by Prime Minister...

Commemorative stone erected at the Indmax site, after the dedication by our PM Mr N Modi...

The Indmax FCC Unit implemented by us on PMC basis at Indian Oil's Bongaigaon Refinery in Assam was inaugurated by Prime Minister Mr Narendra Modi on Feb 22 2021.

Dedicating the plant to the nation, our PM remarked that the increasing oil refining capacity of the country at various refineries, including the Bongaigaon refinery was a much-needed step in the direction of becoming self-sufficient. 'This plant will help pave the way for greater employment opportunities, while stepping up LPG production.'

We had achieved Mechanical Completion of the project in the first quarter of 2020 when the global pandemic started. Commissioning was achieved in the 3rd quarter. At present, a few Offsites & Utilities are in the final stages of completion, which when completed will enable the entire Indmax Project to operate at full capacity .

The inauguration of the project – a key component of the Hydrocarbon Vision 2030 for the North East regions of India – comes as an extraordinary accolade for our organization.

In recent times, IOCL acknowledged our project and site teams for the excellent Quality and OSH Systems maintained, in 2 separate award ceremonies. Also in recent times, the project site achieved a record-breaking milestone of 17 million man hours without LTI – a landmark that came in for praise from the IOCL Management.

Kudos to our Project, Construction and Site/Safety Teams on this occasion!
