The business units at a glance

Copper and Brass Sales: 24 locations, ≈ 1,100 employees

The experts in distribution processing non-ferrous metals and alloys and in managing complete supply chains, from procurement to inventory management and processing services. The portfolio is available both off- and online. Customer-specific offers, including prices and delivery dates, can be called up and orders placed via the company's own e-commerce portal. It is also possible to track deliveries and view shipping documents online at any time.

thyssenkrupp Engineered Plastics: 7 locations, ≈ 100 employees

The full-range supplier and processor of engineering plastics for processors and original equipment manufacturers (OEMs). The offer: particularly resilient industrial plastics, adhesive products, electrical insulating materials, composite materials. These are primarily required for processing services such as rapid prototyping or the production of small series. Nationwide logistics network delivers to the majority of customers in North America within 24 hours. Via an online portal, their customers manage their own accounts 24/7 and track their deliveries along the entire supply chain.

Online Metals: 6 locations, ≈ 90 employees

Leading global e-commerce supplier of metals and plastics, specializing in small to medium quantity custom orders. No minimum order value or quantity.

The 55,000 products available online can also be purchased by individuals, prices can be found directly on the website, individual quotes can be requested for larger orders. The

warehouse and logistics network allows the order to reach 50% of the US population within one day.

Ken-Mac Metals: 7 locations, ≈ 300 employees

The partner for trading in non-ferrous metals: (Pre-painted) aluminum, stainless steel sheets, strips and coils as well as value-added coil and cut-to-size services and stamping work.

thyssenkrupp Steel Services: 3 locations, ≈150 employees

The partner for steel in North America. Focus is on flat, hot-dip and hot-dip galvanized carbon steel products. In addition to custom-fit materials, Steel Services offers its customers inventory management and processing services as well as laboratory services for materials analysis.

thyssenkrupp Supply Chain Services: 25 locations, ≈ 1,400 employees

The North American supply chain solutions expert for the automotive, manufacturing and renewable energy sectors. The range of value-added product management and industrial services is focused on process optimization and control of production flows. In addition, broad portfolio of warehousing and logistics solutions: just-in-time or just-in-sequence deliveries, packaging order management and processing.

thyssenkrupp Materials de Mexico: 3 locations, ≈ 420 employees

For more than 25 years the supplier in the OEM and Tier 1 sector in the Mexican automotive industry. The locations not only sell materials, but also offer product-related and technical services. Highly efficient warehousing and logistics network achieves a just-in-time delivery rate of 100 percent - with maximum flexibility in scheduling. Customers in the construction, aerospace and household appliance industries also benefit from these results.

thyssenkrupp Aerospace: 13 locations, ≈ 540 employees

The expert for the aerospace industry in North America with a wide range of materials and specifications. Delivers customized just-in-time, mostly in already processed form. From tailor-made solutions for customers' different manufacturing strategies to taking over the entire supply chain management.

thyssenkrupp Materials Trading NA: 3 locations, ≈ 30 employees

A leading steel trading partner in North America, benefiting from a global supplier base in the distribution of pipes, structural and rolled steel. Extensive range of steel products (e.g. carbon and stainless steel, non-ferrous metals), but also solid fuels and technical components and equipment. In addition, services are also offered for all industries – including manufacturing, construction, energy, automotive.
