

Aluminum – Copper – Brass

Non-Ferrous Metals from tk accelis Materials
Extensive Selection. Precision Processing.

Our experts in non-ferrous metals are convinced that there is an ideal material, alloy, and processing solution for every application.

The comprehensive product portfolio of tk accelis Materials ensures rapid availability directly from stock. Logistics and processing operations can access these materials immediately, enabling fast and flexible deliveries.

Wide Range of Non-Ferrous Metals

Whether copper, brass, or bronze, we offer the right materials for your project. Precision processing of these non-ferrous metals requires specialized expertise and advanced technologies, whether working with pure metals or alloys. To achieve optimal results, customers benefit from both technical know-how and professional consultation.

Custom Extruded and Drawing Profiles

We manufacture customer-specific profiles and can also provide inventory management and stocking solutions upon request. Non-ferrous metals delivered precisely according to your requirements and ready for integration into your supply chain.

Precision Plate Cutting

Every millimeter counts when cutting materials to size. The Metal Machining Centres at tk accelis Materials offer precision plate cutting, band sawing, and circular sawing services. Our extensive range of non-ferrous metals is supplied with accurate dimensions and without damage, burrs, or scratches. From precision-cut materials to fully customized profile solutions, we deliver materials tailored to your exact specifications.

Our teams support your individual requirements, provide expert consultation on non-ferrous metals, and work with you to develop tailored solutions for your business.
