

thyssenkrupp Polysius Solutions GmbH launches on October 1, 2026

- thyssenkrupp Polysius Solutions GmbH launches as a dedicated lifecycle solutions provider with around 180 employees.
- The new company continues Polysius' heritage of helping customers maximize the value of their equipment through strong OEM know-how, engineering capabilities and technological expertise.
- Polysius Solutions continues to support customers worldwide throughout the entire lifecycle of their plants, providing consulting, modernization, digital solutions, OEM equipment, spare parts and on-site/field services.

Beckum, October 1, 2026 – Today marks the beginning of a new chapter with the official launch of thyssenkrupp Polysius Solutions GmbH. Around 180 employees will transfer from Polysius GmbH to the new company.

The new setup creates shorter decision-making processes and greater customer proximity while retaining the decades of experience and strong reputation associated with the Polysius brand. This allows Polysius Solutions to respond to customer needs even more directly and effectively.

“With a focused offering and continued close collaboration with our international locations, we are well positioned to serve our customers worldwide and support them throughout the lifecycle of their plants” says Heiko Goseling, Managing Director of thyssenkrupp Polysius Solutions GmbH.

For employees, the launch of the new company also marks the beginning of a new chapter, creating greater scope for entrepreneurial thinking and individual responsibility.

Reflecting on the new organization, Heiko Goseling emphasizes: “We are combining the best of both worlds: the expertise and credibility of an established brand with the dynamism of a focused and agile organization. This combination enables us to seize opportunities more quickly, take on even greater responsibility and work together with our customers to create sustainable added value.”

This strategic positioning does not affect the commitment to serving customers and honoring existing commitments. The existing thyssenkrupp Polysius GmbH will continue to operate in parallel to complete ongoing projects and existing contractual obligations.

About thyssenkrupp Polysius Solutions:

Page 2/2

thyssenkrupp Polysius Solutions is a global technology, engineering and lifecycle partner dedicated to helping industrial customers get more from their existing assets. Combining more than 165 years of Polysius heritage with the agility of a focused organization, the company delivers solutions that improve performance, efficiency and sustainability across the entire asset lifecycle.

Its portfolio includes process and technology expertise, modernization and optimization projects, digital solutions, OEM equipment, spare parts and field services. Through deep industry knowledge, engineering excellence and a strong customer focus, Polysius Solutions helps customers enhance operational performance, extend asset life and achieve their long-term business objectives.

Polysius Solutions is built on a simple belief: lasting customer value is created through expertise, ownership and partnership. By combining proven know-how with a forward-looking mindset, the company supports customers in meeting the challenges of today's industrial landscape and preparing for the opportunities of tomorrow.
