

thyssenkrupp Marine Systems Technology Conventions 2020

A platform for sharing the latest naval systems trends and innovations

thyssenkrupp Marine Systems 2020 Technology Conventions will promote exchange and interaction with domestic and international suppliers interested in becoming one of our strategic partners in the future.

We plan to hold up to 10 events in a new format providing technology-focused supplier discussions concentrating on selected product groups such as:

- REP floors
- HMEU
- Communications systems

Technology Conventions 2020 will be a unique occasion for experts to exchange thoughts and lay the foundations for long-term strategic collaboration with thyssenkrupp Marine Systems.

Field reports by industry experts, clients and end customers will form the basis for open discussions on neutral and competitive specifications.

For its new projects (Tamandaré Class Corvettes/HDW Class 212CD Submarines), thyssenkrupp Marine Systems intends to replace up to 33% of its current design candidates with other suppliers in the context of the conventions.

Marine Systems

Technology Conventions 2020

thyssenkrupp

engineering. tomorrow. together.

thyssenkrupp

"We are interested in innovative and reliable partners who can bring us and our clients forward in terms of technology. Our Technology Conventions provide suppliers with a professional platform where they can present their newest developments and pitch their relevance for thyssenkrupp Marine Systems. At the same time, we have the opportunity to assess their price-performance capabilities in person."

Dr. Sebastian C. Schulte
member of the Executive Board,
thyssenkrupp Marine Systems

Benefits & objectives

Technology advancement and laying the foundation for future partnerships

The newest developments will be presented at the 2020 Technology Conventions which will serve as a platform for potential international suppliers.

Discuss current functional and strategic trends in the marine systems industry.

Meet potential international suppliers in person.

Present product innovations and hold initial discussions on alternative sourcing possibilities for new thyssenkrupp Marine Systems projects.

Contact information

Attendance by invitation of the Procurement department of thyssenkrupp Marine Systems only.
