

Apron feeder – modernizations & converts

Successful and efficient project execution

thyssenkrupp

When your feed conveyor is due for repair or refurbishment, thyssenkrupp offers the facilities and qualified personnel to carry out the required work. thyssenkrupp crushing technology experts can engineer a modern state-of-the-art thyssenkrupp apron feeder into the existing installation, including disassembly and assembly, if this is required.

thyssenkrupp's crushing technology team has engineers and technicians based in Germany. With the experience from several projects thyssenkrupp's service team for Revamps & Outages is able to handle projects of any scale and complexity.

Hereby thyssenkrupp offers modification and upgrade to the thyssenkrupp tractor chain design (RKF) which is already in operation in more than 300 plants worldwide.

The apron feeder RKF will be adapted into the existing process in order to reduce the modifications and costs by maximum. Including PlantScan 3D (reversing engineering) we guarantee that the overhauling will be done in the given timeframe.

Service advantages

- We provide efficient project execution
- OEM parts to guarantee quality
- Combined with our Field Service team, we are able to offer on EPC basis
- Cost efficient due to reusing of machine components (substructure, feed bin, guiding plates)
- Short plant down time, only 2 or 3 weeks required

Honduras – Cementos del Norte

Nigeria – Ashaka Cement

Germany – Schwenck Zement

360° Service

Service solutions throughout the entire life cycle of your plant

thyssenkrupp

Parts & supply management

We are the experts when it comes to the supply with spare and wear parts for your plant – over the entire lifetime, at the right time and with the right quality.

Spare parts supply

- All spare parts and components for your asset in OEM quality
- Always state of the art technology with guaranteed functionality
- Attractive frame contracts and supply agreements

Wear parts solutions

- Development of wear parts according to your requirements
- Individual solutions in regards of quality and performance
- Innovative wear parts concepts

Advanced parts solutions

- Engineering and manufacturing of individual spare parts
- Continuous further development of spare parts and components in order to increase the performance of your plant
- Spare and wear parts for plants genuinely not developed by thyssenkrupp

Field & workshop services

We offer you local assistance when it comes to overhauling spare and wear parts, or when maintenance and servicing is needed.

Technical inspections

- Forward-looking inspections of machines and components

Repairs and field support

- Fulltime site support and advice after handover of equipment
- Fault identification and emergency repair of components
- Installation and dismantling
- Equipment adjustments and alignments

Workshop services

- Local fabrication of spare parts
- Refurbishment and supply of thyssenkrupp and third party components

Operator & maintenance training courses

- Customer training for all areas of thyssenkrupp portfolio
- Utilization of product experts within thyssenkrupp's global network

Revamps & outages

Over the course of time, demands change. In order to meet these changed demands, we offer you custom-tailored revamp solutions.

Analysis, engineering and manufacturing

- Plant status and environmental analysis and assessment
- Feasibility studies
- Basic, front-end and detail engineering
- Manufacturing of individual equipment

Plant improvements

- Custom-tailored revamps and retrofitting solutions
- Debottlenecking through capacity extensions
- Efficiency enhancement through modernization and upgrades
- Emission reduction
- Safety and integrity upgrades
- Reliability improvement

Revamps execution up to EPC

- Execution of complex revamp and outage projects
- Execution of EPC revamps projects
- Custom-tailored risk and profit sharing models

Turnaround management

- Management of plant turnarounds

Asset management

We offer you a holistic asset management approach in order to reduce the overall operating expenses of your plant.

Consulting & audits

- Evaluation and assessment of effectiveness and efficiency
- Process mapping and gap analysis
- Derivation and supervision of improvement measures

Technical guidance

- Implementation of improvement measures
- Technical improvement of existing machines and components
- Strategic analysis and future planning
- Improvement of processes and procedures

Operation & maintenance contracts

- Complete or partial take-over of maintenance and/or operations activities
- One-stop operation and maintenance solutions including parts and consumables
- Custom-tailored business models focusing on a win-win situation
