### **GSFC awards thyssenkrupp Industrial Solution (India) LSTK contract for Cryogenic Ammonia Storage Tank**

Gujarat State Fertilizers & Chemicals Limited (GSFC) has inked a contract with thyssenkrupp Industrial Solutions (India) to build a Cryogenic Ammonia Storage Tank with associated facilities at their Shore Terminal in Sikka, Gujarat on LSTK basis.

The 10,000 MT cryogenic storage facility will support the fertiliser major's Di-Ammonium Phosphate complex in Sikka.

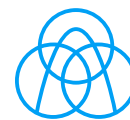

The project will use thyssenkrupp's extensive experience of cup-in-tank double-integrity suspended deck design that has been successfully put to use in a number of similar Cryogenic storages across India & overseas over several decades.

GSFC's association with thyssenkrupp Industrial Solutions dates back to the mid-eighties when the latter built the other 2 Ammonia Storage Tanks in the same location, also on LSTK basis. Over the years, the engineering major has implemented a number of projects for GSFC including the 3rd train of the Di-Ammonium Phosphate plant, and recently, the Additional Facilities project for the company's new Di-Ammonium Phosphate train.

Mr PD Samudra, CEO & MD of thyssenkrupp Industrial Solutions (India) said: 'The project demonstrates the trust our Customer has in us for these projects and we put on record our gratitude for the same. We are proud to be implementing this project for our Customer, and this prestigious project amply demonstrates our leading position in this sector.'

#### About us:

The Industrial Solutions business area of thyssenkrupp is a leading partner for the engineering, construction and service of industrial plants and systems. Based on more than 200 years of experience we supply tailored, turnkey plants and components for customers in the chemical, fertilizer, cement, mining and steel industries. As a system partner to the automotive sector we develop highly specialized solutions to meet the individual requirements of our customers. Around 16,000 employees worldwide form a global network with a technology portfolio that guarantees productivity and cost-efficiency to the highest extent possible.
