

# Railguard

The safety barrier for trenches and pits, designed as a module for mounting on top of trench boxes and sliding rail shoring. Simple system for the DIN-standard safeguarding of danger points along shored pit and trench walls. Thanks to its versatility, this system can be adapted to numerous shoring configurations on site. Barrier fillings of wooden planks must be fitted by the customer himself and are not supplied.

## Components

Art. No.	Short description	G [kg]
880 800	Railguard post	4,5
880 900	Railguard claw	7,0
