### **thyssenkrupp Materials Services expands service offering in Poland and celebrates 25th anniversary**

thyssenkrupp Materials Poland, a company of the Materials Services business area, has further expanded its regional warehouse in the north of the country. The new facility in Nowe Mazy, which recently went into operation, is already the second stage of expansion with around 13,500 square meters of storage space. In the first construction phase, a new warehouse with around 17,500 square meters went into operation in 2017. Together with the other regional warehouses in Blonie, Dabrowa Gornicza and Poznan, Nowe Mazy now provides the company with a unique logistics network for supplying its customers throughout Poland at short notice. In addition, the company has 16 sales offices in almost all parts of the country. The product portfolio includes rolled steel, non-ferrous metals, quality steel, aluminum, plastics and stainless steel. In addition, the Polish company can look forward to a very special anniversary. For 25 years thyssenkrupp Materials Poland has been one of the leading materials and service companies in the industry.

"We are particularly pleased that we have been a reliable partner to our customers for over 25 years. The increased demands of our partners are also the reason why we continue to expand our storage and processing capacities. This enables us to ensure that our customers can concentrate fully on their core business," says Ryszard Bojarski, Managing Director in Poland.

#### **Materials Services in Eastern Europe**

Materials distribution is one of the leading materials and processing specialists in Eastern Europe. With companies in Poland, the Czech Republic, Hungary, Slovakia, Romania, Serbia, Bulgaria and Turkey and sales offices in Croatia and Lithuania, thyssenkrupp has an almost unique materials trading network in the region.

The product portfolio includes rolled and stainless steel, nonferrous metals, plastics and pipes. Furthermore, the company offers customized services such as slitting and cut-to-length, laser and plasma cutting and sophisticated surface treatments for all products. The range of services is rounded off by just-in-time deliveries, customer consulting and individual supply chain services. A total of almost 2,000 employees work in 46 locations to meet the needs and requirements of customers.

### **About thyssenkrupp Materials Services**

With around 480 locations – 271 of them warehousing locations – in over 40 countries, thyssenkrupp Materials Services is the biggest materials distributor & service provider in the western world. The wide-ranging capabilities offered by the materials experts enable customers to concentrate more on their individual core business and span two strategic areas: global materials distribution as a one-stop-shop – from steel, tubes and pipes, nonferrous metals and specialty materials to plastics and raw materials – and tailored services in the areas of materials management and supply chain management. An extensive omnichannel architecture offers 250,000 customers worldwide round-the-clock access to more than 150,000 products and services. A high-performance logistics system ensures that all deliveries are integrated smoothly into customer production processes on a just-in-time or just-in-sequence basis.
