

As the exclusive service provider for the Boeing Raw Material Strategy, TMX Aerospace (TMX) is focused on providing just the right amount of material to support your production needs.

TMX enables you to order materials pre-cut to specified dimensions\*, eliminating the need for outsourcing to cutting facilities and/or freeing up your in-house processing equipment. We deliver the right size or shape needed to streamline your manufacturing process.

When you order cut-to-size material from TMX, you don't pay for the remaining scrap material generated by TMX processing.

TMX offers processing for:

- cut-to-size plate including angle cuts
- sheet shearing
- cut-to-length extrusion
- waterjet straight line cutting
- near-net shape waterjet cutting
- dovetail
- drill and tap

\* Please contact your TMX Customer Service Representative for specification and tolerance data for material and processing. Order requests varying from published material specifications or dimensional tolerance are welcome.

#### Frequently asked questions:

- Q** How is material traceability maintained?
- A** TMX maintains alloy, temper and heat lot information through processing, and labels each piece with the information from the parent material.
- Q** What if I need a special shape cut from plate such as a large arch? What is the process?
- A** Our near-net shape waterjet cutting enables you to purchase the arch without paying for the scrap. Boeing reviews each shape prior to any approval. Please contact your customer service representative for details.
- Q** Are your cut-to-size fees competitive?
- A** Yes, our fees are highly competitive. Also we can help you manage your inventory by putting your cut-to-size material on a JIT program enabling to better manage your cash flow.
